

Hello! Make the virtual butler work for you

Cloud-based assistants, from Siri to Alexa, are getting smarter

Did you know that your smartphone is always listening? Well, it's not just your phone. Your car, your TV, your smart home appliances, and even your coffee maker are all equipped with voice-activated assistants. These virtual butlers are designed to make your life easier by performing tasks like playing music, checking the weather, and controlling your smart home devices. As these assistants become more sophisticated, they will be able to handle more complex tasks, such as scheduling appointments and ordering groceries.

Latest features in Gmail

you might not be aware of

Gmail has introduced several new features to improve your email experience. These include a new 'Smart Reply' feature that suggests quick responses to common email replies, and a 'Smart Compose' feature that automatically generates drafts for you. Additionally, Gmail now offers a 'Smart Mailbox' that organizes your inbox into categories like 'Important', 'Social', and 'Promotions' to help you manage your email more effectively.

Smart home devices

Smart home devices are becoming increasingly popular as they offer convenience and energy efficiency. From smart speakers to smart light bulbs, these devices can be controlled remotely via your smartphone or voice commands. This allows you to manage your home environment from anywhere, making your life more convenient and efficient.

This premium laptop means business

The new premium laptop is designed for professionals who need a powerful and reliable device for work. It features a high-resolution display, fast processor, and long battery life, making it ideal for business use. The laptop is also equipped with advanced security features to protect your data, ensuring that your work is always safe and secure.

Business by the numbers

Mill a precision tool

Mill is a precision tool used in manufacturing and engineering. It is designed to create highly accurate and complex parts with tight tolerances. The tool is used to grind and finish surfaces, ensuring that they meet the required specifications. This makes it an essential tool for industries that require high-precision components, such as aerospace and automotive manufacturing.

New 3D printed camera provides help for those with eye ailments

Sony has developed a new 3D printed camera that is designed to help people with eye ailments. The camera is small, lightweight, and easy to use, making it an ideal device for those who have difficulty seeing. It provides a clear and detailed view of the world around you, helping to improve your quality of life. The camera is also compatible with a variety of mobile devices, making it easy to integrate into your existing technology.
