Sebi mulls cyber lab for securities market

PTI  
Feedback@sebi.mca.gov  
NEW DELHI

Markets regulator Sebi is in the process of setting up a cybersecurity lab to detect cyber threats faster and resolve such incidents efficiently and effectively.

In its annual report for 2019-20, Sebi noted that cyber attacks and threats attempt to compromise the confidentiality, integrity and availability of the computer systems, networks and databases in the market's ecosystem.

Establishing a cybersecurity fusion centre or a cyber lab is part of Sebi's three-tier structure for monitoring cybersecurity related events in the securities markets and taking actions as deemed necessary in the interest of protection of the securities market.

The three-tier structure would strengthen the cybersecurity preparedness or resilience of the entire securities market ecosystem.

Under the tier-1, high-powered steering committee on cybersecurity chaired by a whole-time member of Sebi has been set up and a cybersecurity fusion centre would be established under the tier-2, the regulator said.

In the tier-3, division of technology and cybersecurity on Sebi would coordinate with the steering committee, cyber security laboratory and operations centres at the respective market infrastructure institutions (MIIs).

"Tier-1 and tier-2 have been set up and Sebi is in the process of setting up a Sebi cybersecurity fusion centre," according to the annual report.

# Corp earnings grew faster in Q3 despite pandemic

A Mint analysis of 2,485 firms shows that net profit grew fastest in at least 25 quarters

Nandini Suresh & Parthiv Shah  
MUMBAI

Corporate earnings grew at a robust pace in the December quarter in a bright spot for the Indian economy that is seeking to ride out of the brutal effects of the pandemic.

Out-of-home consumption, festive demand and improved consumer sentiment, besides benefits of light cost control to better-diagnosed earnings growth during the quarter.

A Mint analysis of 2,485 publicly-traded companies, which reported earnings for the three-month-ended 31 December showed that net profit after adjusting for one-time items grew at the fastest pace in at least 25-quarters, at 71.95% from a year earlier, according to data compiled by Capitaline. That compares with a 24.88% rise in the September quarter and a contraction of 12.93% in the December quarter of 2019.

The review excludes banks, financial services and insurance, and oil and gas companies as they follow a different revenue model. During Q3FY21, net sales growth of these set of companies grew 7.17% from a year earlier—seven-quarter high. This is a recovery from a 1.8% decline in the September quarter, and a 21.3% drop in the December quarter of FY20.

"Broadly, earnings across most sectors have been quite robust this quarter and have continued to meet price-corrected estimates. Earnings from most metals stocks have been very strong led by high realizations within the construction sector, ex-

## Improved prospects

Out-of-home consumption, festive demand, improved consumer sentiment, and light cost control led to better-than-expected earnings growth during the quarter.

ception has almost normalized to pre-covid levels and also saw very strong order inflows; this trend was also reflected in strong volume growth for the cement sector. Pent-up demand drove volumes for discretionary stocks in Q3FY21, strong

consolidation in favour of organized players also helped overall demand growth, he added.

Net profit margin of these firms expanded to 9.15% in the three months to December from 7.54% in the preceding quarter and 6.34% a

second quarter results—continued big bets and upgrades, and upbeat corporate commentaries across sectors and companies," said Gautam Duggal and Anant Patasram, analysts at Motilal Oswal Financial Services.

To be sure, analysts cautioned that some of the cost rationalization measures by companies are likely to reverse as the economy starts to open up. Rise in prices of major commodities is feared to hit gross margins. Analysts expect companies to offset the impact through product price increases and cost-saving initiatives. Prices of major commodities surged in the December quarter. Crude oil prices jumped 26.5%, while aluminium, copper and zinc rose 14-18%, in rising raw material costs for these companies.

"Rising commodity prices pose a risk for volume growth and margins. Some sectors such as automobiles and consumer durables have already started to take price hikes to pass on the cost pressures to high commodity prices—its impact on volume growth would be a key factor to watch going ahead," said Shah.

He added that earnings for Nifty companies is likely to rise 37% in FY21 on the back of the positive earnings surprise seen for most sectors and stocks, and a growth-focused FY21 union budget.

Though improvement in the overall economy has not been able to catch up with the fast-paced recovery in corporate earnings, analysts are optimistic that the budget proposals with a focus on capex expenditure and infrastructure investments will be beneficial going ahead.

## LOOKING UP

**DURING** Q3FY21, net sales growth of firms grew 70.7% from a year earlier—a seven-quarter high.

**THIS** is a recovery from a 1.8% decline in Sep quarter, and a 21.3% drop in Dec quarter of FY20.

**STRONG** volume growth continued in Q3 and the FY sector saw strong deal wins, notes BofA Securities.

**NET** profit margin of firms expanded to 9.15% in the three months to Dec from 7.54% in previous qtr.

volume growth continued into Q3FY21 as well as the IT sector continues to see strong deal wins," said Anish Shah, India Equity Strat eqs, BofA Securities.

A buoyant festive season, pent-up demand, strong rural growth and

year earlier.

Likewise, operating profit margin widened to 23.76% in Q3 from 22.53% in the preceding quarter and 19.98% in Q3FY20.

"The Q3FY21 earnings season has maintained the momentum of the

fast-paced recovery in corporate earnings, analysts are optimistic that the budget proposals with a focus on capex expenditure and infrastructure investments will be beneficial going ahead."

India is extremely dependent on China.

Four of these fermentation-based bulk drugs were not made in India, and the government offered about half of the incentives to promote local manufacturing.

Analysts have been upbeat about Aurubindo's strategy on APIs, with Zara Capital raising it a key growth engine, along with segments such as biologics, vaccines and injectables.

Aurubindo is also foraging into vaccine manufacturing, and is setting up facilities to make viral and bacterial vaccines and expects revenues from the segment within 18 months.

## Aurobindo to go big on API manufacturing

PTI  
www.aurobindo.com  
NEW DELHI

After scaling up manufacturing of high margin finished formulations significantly, Aurobindo Pharma is looking to shift its focus back to most of manufacturing bulk drugs, especially fermentation-based active pharmaceutical ingredients (APIs), for which Indian drug makers are almost entirely dependent on China.

"The capacity creation we have done on formulation is enough for us for the foreseeable future. Now, we are shifting focus in terms of regular capex flow more into the API," N. Govindarajan, managing director, Aurobindo Pharma, said on Thursday.

The Hyderabad-based firm plans to invest ₹3,000 crore over 30-32 months, and will manufacture four more fermentation-based bulk drugs that are not currently made in India. Cost of ₹900 crore is current

The firm will invest ₹3,000 crore over 30-32 months.

extent, the border tension with China disrupted the supply of bulk drugs in February-March 2020. The center then came up with its ₹2,940 crore production-linked incentive scheme for over 10 bulk drugs.

Last month, Aurubindo was selected to set up plants for making three of the four bulk drugs, including penicillin G, 7-ACA and erythromycin thiosuccinate. It is expected to get a lion's share of the nearly ₹3,000 crore incentives est-

marked for the four drugs over the next six years.

The company also plans to double external sales of APIs in four-five years, as per its investor presentation.

In October-December, \$206 million (₹1,495 crore) of its consolidated revenue of 16,365 crore were from APIs, including APIs used to make its own formulations. External sales of APIs were just at 10.62 crore.

The rest was from formulations, with the US market generating over half of its sales.

"In Oct-Dec, the firm earned ₹1,495 crore of consolidated revenue from active pharmaceutical ingredients

more local manufacturing.

Analysts have been upbeat about Aurubindo's strategy on APIs, with Zara Capital raising it a key growth engine, along with segments such as biologics, vaccines and injectables.

## ReNew Power eyes US listing via SPAC at \$4 bn valuation

PTI  
www.renewpower.com  
MUMBAI

ReNew Power Pvt. Ltd is planning to list its shares in the US through the fast-emerging SPAC (special purpose acquisition company) route at a valuation of almost \$4 billion, two people aware of the development said.

The company, one of India's largest renewable energy firms, is set to merge with RMG Acquisition owned by Nasdaq-listed Riverside Capital Management, the people cited above said on condition of anonymity.

ReNew Power had shelved its Indian initial public offering plan in 2019 amid market volatility. As per Securities Exchange Commission rules, while Riverside will hold up to 20% in the newly listed acquirer of ReNew Power, Goldman Sachs along with CPPIB, ADIA and the company's founder chairman Sumant Sinha will hold the rest 80%, one of the two people cited above said.

"The due diligence process for the listing of ReNew Power through SPAC has already begun and once completed, it will mark the largest ever listing of an Indian company in the US through SPAC route," the person said.

"In the case of ReNew Power, SPAC Riverside is expected to put in \$300 million through equity and another \$150 million through warrants."

Earlier, in Riverside and ReNew Power, remained unannounced, while a Goldman

Sumant Sinha, founder and chairman, ReNew Power

Sachs spokesperson declined to comment.

ReNew is one of India's largest renewable energy independent power producers with capacity of 6,114 MW, of which 5,736 MW is operational.

For the April-September 2020 period, ReNew Power's total income stood at ₹72.5 crore as compared to ₹57.6 crore for the same period in 2019. Its total loss ballooned to ₹23.0 crore during April-

September as compared to ₹26.7 crore in the year ago period.

Since the outbreak of covid, the SPAC market has become popular as issuers worry that the conventional IPO market could take many months to recover.

Data from IIFintly, a data analytics firm, shows 120 SPAC IPOs raised \$44 billion in the first nine months of 2020, which is more than three times the sum raised during the same period in 2019, according to the firm.
